

CITY OF WAYLAND 2020
SEASONAL LAWN WATERING PROGRAM
FEE'S AND INSTRUCTIONS

Some residents do extensive watering for lawns and gardens. These residents use water and are also charged sanitary sewer fees. The current fee base assumes that all water used is also water discharged into the sanitary sewer system. This “water-in equals water-out” system does not recognize residents who water lawns and gardens, wash vehicles and siding, or fill pools.

Under this program, residents who request an extra meter will not be charged the sewer fees for water metered and used for lawn and garden watering, vehicle and siding washing, or filling pools.

PROGRAM DETAILS

- Program runs May 1, 2020 through October 31, 2020.
- **If the meter is not returned by October 31, 2020 a \$25.00 fee will be added to your account until the meter is returned, or if it is returned damaged in any way.**
- The meter will be fastened on an outside faucet by the homeowner.
- Garden hoses or sprinkling systems may be connected to the meter.
- The amount of water recorded on the extra meter will not be charged sanitary sewer fees. Meter readings must be brought or called into the City Office for recording by the **3rd** of each month. **(269-792-2265)**. There will be a service fee of \$10.00 a month for each meter.
- Residents requesting a meter will sign an agreement with the City of Wayland.

Installation Instruction's

Meter should be installed horizontal and level with the dial facing up. You may want to support the weight of the meter to prevent damage to your plumbing. The City is not responsible for any plumbing or pipe damage that may occur during the use of this meter.

I have read the above terms and agree to them.
